BOTTOM LINE FOR LENDER:

Modifying preserves \$9,521,297 of value vs Foreclose-Today, and \$1,843,466 vs REO Sale.

Path B is materially superior on every dimension: recovery %, time, and capital at risk.

FOR THE BORROWER PRESENTATION:

1. Lead with the side-by-side table — lender sees their own economics
2. Frame: "We're offering you ~104% recovery vs. 61-93% in distress sale"
3. Sponsor capex commitment is the proof of intent (skin in the game)
4. Frame the rate cut as the lender's "insurance premium" against a worse outcome

1. DPO at \$16MM creates ~\$5.9MM of immediate value vs. existing \$21.9MM senior balance — capture
2. New LP IRR clears 20% hurdle in ALL tested scenarios (cap 5.5–7.5%, hold 1.5–3.5 yrs). Even at 7.5
3. Hope Note recovery ranges 10–41% across the grid. Base case (6% cap, 2.5yr): 31% recovery on \$1
4. Agency sizing test: \$16MM debt / \$1.76MM stab NOI = 11.0% debt yield (passes Fannie/Freddie 9–10)
5. Waahe must consent to: (a) converting \$2.81MM Member Loan + \$3.89MM A/P to Hope Note paper,
6. Existing LPs (\$4.53MM) must accept Hope Note paper in lieu of any cash at close — functionally a write-down
